1113-14 OLD-FIRST BANK BUILDING

FORT WAYNE, IND.

**YOU SPEND 1,000 HOURS A YEAR  
IN YOUR KITCHEN !**

- In an effort to illustrate the developments in the planning of this important room, the Gas Company has installed two model kitchens, shown above, in its recently modernized offices in the Utility Building.
- You are cordially invited to inspect these All-Gas kitchens, which will be changed from time to time to keep up with the improvements in design and usefulness created by the foremost designers of the country.
- See these model kitchens in operation . . . you'll realize why more than 16,000,000 American housewives have chosen gas, the cheap and reliable modern fuel, for their kitchen.

Good Buildings Deserve Good Hardware

IT has been our privilege to furnish Corbin Hardware on a large portion of the structures designed by A. M. Strauss.

Good architects believe in good hardware and specify it. They know how much it has to do with the use of a building and with the character of a building and with the beauty of a building.

**M**INNEAPOLIS-HONEYWELL engineers have developed in the Gradutrol System a method of control for valves and dampers which positively guarantees infinite positioning. Valves and dampers assume exactly the position necessary to meet demands of the thermostat.

This new standard of accuracy applies to all units of a Gradutrol installation, from the famous Gradutrol Helmet Seal thermostat to the compressor. Although Gradutrol installations are noted for their service-free dependability, M-H Gradutrol Service is nationwide.

With all its advantages over conventional pneumatic control, the Gradutrol System is available at no extra cost. Comparison is cordially invited. Minneapolis-Honeywell Regulator Company, Minneapolis, Minnesota. Branch or Distributing offices in all principal cities.
